

List Name	Chemical Name/AKA	Type of drug	Notes
Substances emerging pre-2010: highlighted compounds are allegedly currently sold online in UK			
6-APB	6-(2-aminopropyl)benzofuran Benzo Fury	Stimulant Structurally similar to E	Pellet and powder forms around; lots of discussion and some drugs which seem to work and are effective and lots which don't. Arguments about who sells the "real" 6-APB Currently legal in UK
BZP	Benzylpiperazines	Stimulants	Were widely available as a legal alternative to E; now class C controlled drugs.
MMCAT	Methylmethcathinone Mephedrone, 'drone Miaow Miaow	Stimulants Substituted cathinone	Most widely distributed one-time legal high. Now a class B controlled drug
MDPV	Methylenedioxypropylvalerone	Stimulant Pyrovalerone	Was widely touted at the same time as MMCAT; made illegal at same time. Crops up in NRG1 and other compounds.
GBL	Gamma Butyro Lactone	GABA agonist	Formerly sold on-line by name; now a CD if supplied for ingestion, but crops up in products such as nail varnish remover
JWH-018	Spice	Synthetic cannabinoid 'Spice' type of synthetic drug mimics effects of THC Class B	
JWH-122	Spice		
HU210	Spice		
HU-243	Spice		
CP50-5561	Spice		
Drugs first reported in 2010 in Europe (EMCDDA/Interpol) – highlighted compounds are allegedly currently sold online in UK			
2C-B-BZP	(1-(4-bromo-2,5-	Piperazine family	Stimulant

	dimethoxybenzyl)piperazine) –		
MDAI	(5,6-methylenedioxy-2-aminoindane) Sparkle	Analogue of amphetamine	Stimulant with similar chemical effects to Amphetamine; but also elevates levels of serotonin – so providing a more “enactogenic” Ecstasy-type feeling; Referred to in the media as Woof Woof (but nowhere else) Legality uncertain but widely considered to be legal
β -Me-PEA (2-phenylpropan-1-amine)	β-Methylphenethylamine	Stimulant; amphetamine type drug	Has cropped up in some sampled; probably Class A under UK law but not certain
N-benzyl-1-phenethylamine		Phenylethylamine	Probably class A under uk Analogue clauses
N,N-dimethylphenethylamine		Phenylethylamine	Probably class A under uk Analogue clauses
4-FMA	(4-fluoromethamphetamine)	Amphetamine	Class A drug
RCS-4	((4-methoxyphenyl)(1-pentyl-1H-indol-3-yl)methanone)	Synthetic cannabinoid	‘Spice’ type of synthetic drug mimics effects of THC Class B
JWH-081	(1-pentyl-3-(4-methoxy-1-naphthoyl)indole)	Synthetic cannabinoid	‘Spice’ type of synthetic drug mimics effects of THC Class B
Naphyrone	Naphthylpyrovalerone NRG1	Stimulant Pyrovalerone	Class B Was touted to be the “next MMCA” but was made illegal early in proceedings
Iso-ethcathinone	(1-ethylamino-1-phenylpropan-2-one)	“substituted cathinone” Stimulant	Same family as MMCA; Class B
DMAA	(1,3-dimethylamylamine)	stimulant	Relatively low potency on a par with ephedrine; some use by body builders

			as a cutter
Dimethocaine	((3-diethylamino-2,2-dimethylpropyl)-4-aminobenzoate) DMC Laracaine	Cocaine analogue	Low potency local anaesthetic; Being heavily flogged by a lot of websites
JWH-073 methyl derivative	(1-Butyl-3-(1-(4-methyl)naphthoyl)indole))	Synthetic cannabinoid	'Spice' type of synthetic drug mimics effects of THC Class B
Buphedrone	(2-(methylamino)-1-phenylbutan-1-one)	stimulant	Reputedly 10x strength of MMCA; limited availability; stimulant, not highly euphoric Class B
4-methylethcathinone	(2-Ethylamino-1-(4-methylphenyl)-1-propanone)	"substituted cathinone" Stimulant	Same family as MMCA; Class B
AM-694	(1-[(5-fluoropentyl)-1H-indol-3-yl]-(2-iodophenyl)methanone)	Synthetic cannabinoid	'Spice' type of synthetic drug mimics effects of THC; Class B
JWH-122	(1-pentyl-3-(4-methyl-1-naphthoyl)indole)	Synthetic cannabinoid	'Spice' type of synthetic drug mimics effects of THC; Class B
MPBP	(4'-methyl--pyrrolidinobutyrophenone)	Related to Pyrovalerones	Stimulant; Class B
JWH-015	(1-propyl-2-methyl-3-(1-naphthoyl)indole)	Synthetic cannabinoid	'Spice' type of synthetic drug mimics effects of THC; Class B
4-MBC	(4-methyl-N-benzylcathinone)	"substituted cathinone" Stimulant	Same family as MMCA; Class B
MPPP	(4'-Methyl--pyrrolidinopropiophenone)	Related to Pyrovalerones	Stimulant; Class B
CP47,497		Synthetic	'Spice' type of synthetic drug mimics

		cannabinoid	effects of THC; Class B
1-naphthalen-1-yl-2-pyrrolidin-1-yl-pentan-1-one		Related to Pyrovalerones	Stimulant; Class B
Pentylone	(2-Methylamino-1-(3,4-methylenedioxyphenyl)pentan-1-one)	Another cathinone-related beta-ketone Stimulant	Covered by cathinone analogue clause Class B
M-ALPHA	(1-methylamino-1-(3,4-methylenedioxyphenyl)propane) Methylone (?)	Stimulant Substituted cathinone	Class B
5-MeO-DPT	(5-methoxy-N,N-dipropyltryptamine)	Hallucinogen Tryptamine	Class A in UK
-Ethyl-Methcathinone	(2-methylamino-1-phenyl-1-pentanone)	Stimulant Substituted cathinone	Class B
3,4-Dimethylmethcathinone	(1-(3,4-dimethylphenyl)-2-(methylamino)propan-1-one)	Stimulant Substituted cathinone	Class B
JWH-203	(2-(2-chlorophenyl)-1-(1-pentylindol-3-yl)ethanone)	Synthetic cannabinoid	'Spice' type of synthetic drug mimics effects of THC; Class B
JWH-019	(1-hexyl-3-(1-naphthoyl)indole	Synthetic cannabinoid	'Spice' type of synthetic drug mimics effects of THC; Class B
Methoxetamine	(2-(3-methoxyphenyl)-2-(ethylamino)cyclohexanone) MXE MKET	Ketamine analogue	Currently being sold by a number of retailers Currently legal Effects broadly as for ketamine
3-(4-Hydroxymethylbenzoyl)-1-		Synthetic cannabinoid	'Spice' type of synthetic drug mimics effects of THC;

pentylindole			Class B
MDPBP	(3',4'-methylenedioxy--pyrrolidinobutyrophenone)	Stimulant Substituted cathinone	Class B
3-MeO-PCE	(3-methoxyeticyclidine)	Related to methoxetamine so a relative of ketamine – i.e. a dissociative anaesthetic hallucinogen	Not currently regulated in UK
bk-MMBDB	(2-dimethylamino-1-(3,4-methylenedioxyphenyl)-butan-1-one)	Stimulant Substituted cathinone	Class B
Arecoline	(methyl methyl-1,2,5,6-tetrahydropyridine-3-carboxylate)	Active compound in the Areca (betel) nut Mild stimulant	Legal
BMDP	(2-benzylamino-1-(3,4-methylenedioxyphenyl)propan-1-one)	Stimulant Substituted cathinone	Class B
BMDB	(2-benzylamino-1-(3,4-methylenedioxyphenyl)butan-1-one)	Stimulant Substituted cathinone	Class B
5-APB	(5-(2-aminopropyl)benzofuran)	Relative of 6-APB Stimulant	Not sure how much of this is really around.
Desoxy-D2PM	(2-(diphenylmethyl)pyrrolidine)	Powerful stimulant;	some compounds sold as A3A analysed and found to contain this substance
Compounds Currently marketed but not formally identified			
A3A	<i>,3,4,5-tetrahydro-1H-1,5-methano-3-benzazepine</i>	Should be chemically related	Evidence suggests compounds sold as A3A contained more powerful

		to varenicline	stimulant D2PM
2m2b	2-methyl-2-butanol	Cousin of alcohol	More potent than ethanol; liquid; drunk Lawful, long term risks not known
5-MeO-DALT			
AMT	Alphamethyltryptamine	Tryptamine; hallucinogenic	Long acting hallucinogen – 8-12 hours. Possible MAOI effects. As of Aug 2010 believed to be still legal in UK
AM-694	1-(5-fluoropentyl)-3-(2-iodobenzoyl)indole	Synthetic cannabinoid acts at CB1 receptor	Potent synthetic cannabinoid not covered by recent (dec 2010) extensions to cannabis legislation; may be constituent in smoking blends currently doing the rounds.
Black Mamba	? no analysis available	Sold as alternative to cannabis – lists contents as Damiana	Drugs agencies in North reported yep hospitalized after smoking this; May be Damiana, and/or damiana+synthetic cannabinoid
C1C	No analysis available	Stimulant – but not potent	Being sold on some sites – but very small number of non-complimentary trip reports; could be anything.
Dextromethorphan	DXM	Opiate	One website offering this at £16/g Opiate found in some OTC cough treatments; at high doses can have more hallucinogenic effects. Definitely covered by UK medicines act,
Fury X	???	?? Stimulant	If it exists (and there's some samples that went out in April 11) it could be products like 5-apb or 6-apb repackaged or could be something else. Frankly, who knows!
Green Granules	Jolly Green Granules	Stimulants	Probably lots of old MMCAT and

	Kryptonite		other drugs repackaged as green pellets and sold. Shipments in to Jersey tested as being cathinone derivatives.
JCB	Jolly Crystal Bomb	?? Stimulant	As with other compounds could be anything, including now illegal compounds being repackaged and resold
Magic Crystals		?? Stimulant	As with other compounds could be anything, including now illegal compounds being repackaged and resold
MDEX	???	???	Being offered on one site as a pellet but no other information available
Methiopropamine	MPA	Stimulant	Some low level trip reports; appears to be a low level stimulant if indeed it exists at all. No authoritative information as of 5/11
NRG2	???	Sold as a stimulant	Analysis of compounds sold as NRG2 indicate a lot of other things – both legal and illegal – are sold as NRG 1,2, and 3.
NRG3	???		
Red Rockets		? Stimulants	Probably as Green Granules, old MMCAT and MDPV stock repackaged and resold
Synthacaine	???	Stimulant	Supposedly an analogue of methylphenidate but more likely than not just a load of white powder passed off as the latest thing...

[List compiled 29th May 2011 based on available information at the time. In a rapidly changing situation list will not remain up-to-date for long. No responsibility accepted for errors or omissions. Please notify KFx of changes/updates/errors. mail@kfx.org.uk]
